DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 14-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kempster et al. (US 5,873,809) in view of Brooks (US 3,089,695).

Kempster et al. disclose a cushioning conversion machine comprising a frame; first and second rotating feed members 24 resiliently biased towards one another by springs; see figure 10. The lower feed member is driven and the upper is positioned upon an idler shaft. The members form a pinch force on the material fed between.

Kempster et al. do not disclose exactly how the biased members are mounted, however Brooks teach rotating feed member 1 in carriers 23 (figure 3) pivotally mounted on pivots biased by springs 68. The releasable locking device is in the form of a hydraulic cylinder 40. When the device is in its locked position the cylinder forces the cylinder towards roller 2 and when released allows for pivoting away.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to mount the rotating members as taught by Brooks in the invention of Kempster et al. in order to provide biasing towards one another.

Regarding claim 22, the Examiner takes OFFICIAL NOTICE that it further would have been obvious to one of ordinary skill in the art to substitute a leaf spring for the coil spring as they are recognized in the art as obvious variants.

Response to Arguments

3. Applicant's arguments with respect to claims 14-22 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
